

SESD 30 Z 02

Special module with HV cable

Distance triggering

- For tests with distance triggering
- As a special module for tests behind a protective hood in combination with the devices of the SESD series:
SESD 216
SESD 230
SESD 30000

**Suitable for all simulators
of the SESD series**

Overview

The special module with HV cable allows the ESD pulse to be applied to DUTs or fixtures behind a protective hood or inside a safety test hood.

The HV cable with luster terminal has a length of 1 m.

The pulse is based on standard specifications, but cannot be calibrated to these.
