

EMC Software

Reporting Software and Remote Control Software

Software

- Automatic creation of test reports via the reporting software
- Remote control of AXOS devices with the Remote Control Software via PC/tablet or smartphone

**Only for AXOS devices from
HAEFELY!**

Overview

Reporting Software for test reports

The reporting software creates automatically a test report. The main header can be adjusted with the individual company logo or any other text required. The data input can either be supplied directly via the remote control software or when saving the data on a USB drive. Furthermore, the data can be used from the sequence mode menu directly and the report gets generated. Detailed information will be provided with the reporting software tool itself. The reporting software is compatible with Windows 7 / 10 (32- and 64-bit) and Windows 11.

Remote Control Software

The optionally available remote control software simply enables the user to remote control the AXOS5 and AXOS8 by using a remote device like a standard PC, Tablet or Smartphone. The connection can either be established by putting in a ethernet cable "point to point" or via wifi network (a separate access point will be required).
