

Switch Box

Connection of AXOS additional devices

For AXOS devices:

- Connects AXOS with up to 3 external accessory units
- Plug-and-play - connection cable included
- AXOS detects the devices via the switch box

**Only in combination with
AXOS 5 / 8 from HAEFELY!**

Overview

The SWITCH BOX is a simple extension of the AXOS 5 and AXOS 8 test system for connecting several AXOS additional devices simultaneously. On the front of the switch box there are three LED diodes indicating the active output 1, 2 or 3, depending on the customer's selection.

The SWITCH BOX was developed to avoid the manual reconnection of additional devices to the AXOS (there is a link port on the AXOS) and thus to shorten the time for the test setup.

Key facts

- AXOS automatically detects the type of the connected additional device via the switch box
- Usable with rack or stand-alone solution

Technical data

Switch Box

Mains Power Supply	Powered by AXOS 5 / 8
Dimensions (W x H x D)	450 x 90 x 310 mm (17.7 x 3.5 x 12.2 in)
Rack Size	19" / 2 HU – 3.5 in (88.9 mm)
Weight	5 kg (11.02 lb)

Output connection	3x female SUB-D 37p
Input connection	1 x male SUB-D 37p
Output control	via "Toggle"-button

Options

No. 2490400	AXOS 5	Multi functional device
No. 2490800	AXOS 8	Multi functional device

Scope of delivery

Switch Box, Male/female cable SUB-D 37p (1 m)
